Coffee 101

The difference between a cup of gourmet coffee and a cup of more common coffee comes down to the coffee bean. There are basically two kinds of beans, Arabica and Robusta. They are both grown all over the world. Arabica is grown at higher elevations and takes four or more years to produce a bean from the fruit of the tree and is much more difficult to grow. High quality coffee blends consist of 100% Arabica beans. Lower quality cheaper blends consist of Robusta beans which take about two years to bear fruit and can grow under harsher climate conditions. Robusta beans tend to produce a more bitter flavor. At Golden Nugget we use 100% Arabica beans for a superior tasting cup of coffee.

*The Illinois Department of Public Health advises that eating eggs
cooked over easy or over medium or eating raw and undercooked meat,
poultry, eggs, or seafood poses a significant health risk to everyone but
especially to the elderly, children under four, pregnant women and other
highly susceptible individuals with compromised immune systems. Thorough
cooking of eggs to over hard or meats to medium or higher reduces this risk.
